

### 20 plate 40 cm x 40 cm plate filter with crossover plate

The pressure gauge on the movable platen of this model is not on all filters of this style, and it allows for proper monitoring when doing two stage filtrations. Setup allows for back-flushing of first stage only while maintaining filter integrity. Typically, only the first stage will clog during these filtrations. Purchased new in 2018. Used, maintained, and stored properly.

Missouri delivery available; Price includes consulting from 30-year veteran winemaker.
